## User's Manual

Congratulations on your new

# LIFTHOR MUNIN

Tablet Holder for  
Parrot Anafi & Skydio 2

## Content:

- Fully assembled mount
- Universal Clamp \*
- (2x) M4 x 10 steel thumb screws
- Star Knob thumbscrew
- Wrench
- Hex Key / Allen Key

\*Universal clamp: Compatible with smart phones and up to 12.9" tablets  
(expanding clip range 65mm - 230mm)

To assemble:

Secure the pre-assemble mount in place by gently tightening the two thumb screws provided as shown in the picture.

Loosen up the utility mount using the hex key and wrench provided to adjust its angle.

Mount the universal clamp using the star knob through the utility mount.

Our LifThor universal clamp has **two** mechanisms to ensure your tablet sit secure and in place.

The **first** mechanism is the ratchet part, it can be extended in 6 fixed steps (3 on the top / 3 on the bottom) to adjust to the size of your tablet. We recommend setting it a little smaller (1" / 2.5cm) than the actual size of the tablet for a tight, secure fit.

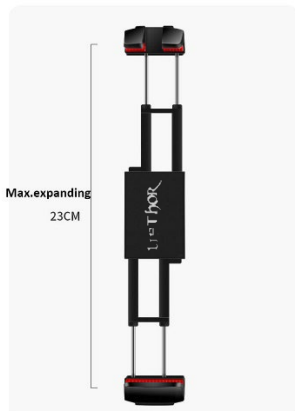

Press and hold the side buttons to extend the ratchet mechanism

Place the phone / tablet in landscape mode by pulling the spring mechanism upwards and release it to secure the device in place.

**\* It's the spring-loaded part that will hold your device in place !**

Compatible with most smart phones and tablets up to 12.9"  
Minimum expanding 6.5cm – Maximum expanding 23 cm

# Alternative setups:

Integrated tripod  
mounting point located  
underneath the  
aluminum base

\*Quick release bracket  
sold separate

\*StrapThor Pro Lanyard sold separately
