

**Tripod bracket  
for DJI  
Phantom / Inspire**

by Thor's Drone World

User's Manual

## Content:

- Mounting bracket
- Hex Key / Allen Key

# How to assemble:

To open the bracket, loosen up the 4 smaller screws located on each side of the bracket with the hex key provided

Align the tripod bracket with the wire frame on the bottom of the RC

Position the bracket as close as possible to the edge to avoid obstructing the RC's I/O ports.

Secure the tripod bracket back with the screws, you can insert all screws before tightening them to have the mount aligned while you secure the bracket

Your tripod bracket is now properly mounted!

All set!  
Enjoy your flight!
