

# LIFT THOR LITE

TRIPLTEK mount for  
Phantom 4 / Inspire / Agras  
by Thor's Drone World

## User's Manual

Congratulations  
on your new

LIFTHOR  
LITE

the Ultimate Tablet holder for  
DJI Phantom / DJI Inspire / DJI Agras

# Content:

Tablet clamp

Compatible with 7.9" up to  
13" devices

Mounting  
bracket

Screws (x2)  
& washer

Hex Key (x2)

Additional tools needed:  
-Flat Screwdriver

# How to assemble:

Remove the OEM bracket from the Remote control with the help of a screwdriver. (not included)

With the tips of your fingers unscrew the rear support of the bracket to remove the OEM bracket.

Align the LifThor Lite mounting bracket and secure lightly with the smaller screw with the smaller Hex Key (Allen key) provided

Secure the rear end of the bracket with the bigger screw and washer provided, once secured in place tighten the front screw by pushing down the bracket to align properly.

Unscrew the tightening ring from the back of the tablet clamp and place it on the ball joint

Attach the clamp to the ball joint and screw the ring back to secure the clamp position / angle.

The clamp has two mechanisms to ensure your tablet sit secure and in place.

The first mechanism is the ratchet part, to adjust to the size of your tablet. We recommend setting it a little smaller (1" / 2.5cm) than the actual size of the table for a tighter, secure fit.

 Once you have selected the right height lock the ratchet in place by sliding the lock downwards.

Place the tablet in landscape mode by pulling the spring mechanism upwards and release it to secure the tablet in place. You can adjust the top clamp brackets, if needed, to avoid pressing on any buttons
