

LIFT THOR^{SC} **PRO**

by Thor's Drone World

User's Manual

Utility mount for DJI Smart Controller

Content:

- A. LifThor SC PRO Utility Mount
- B. 2 x thumb screws M4
- C. ¼"-20 Knob screw
- D. Hex Key
- E. HDMI 4K HighSpeed cable (30cms)
- F. Adjustable Quick Release StrapThor Lanyard
- G. LifThor protection / carrying bag

How to mount:

Gently lower the DJI Smart Controller with a slight angle into the bay of the LifThor SC PRO

Align the controller with the LifThor SC PRO in order to get access to the controller's mounting points.

Secure the controller in place with the (2x)M4 thumb screws provided

You have now mounted your DJI Smart Controller properly to the LifThor SC PRO utility mount

Set up the StrapThor Lanyard

Unplug the Quick Release adapter from the lanyard by pressing firmly on the sides

Loop the string through the LifThor SC PRO and pull to secure, reconnect it to the lanyard.

How to mount an additional monitor (or any other utility / device)

Use the $\frac{1}{4}$ "-20 knob screw provided, to secure the monitor (or any other utility) in place to the LifThor SC PRO through the hole located on top of the mount

Knob screw

To fix the angle of the monitor use the provided Hex Key to tighten it in place

How to mount the LifThor SC PRO on a tripod.

The LifThor SC PRO is equipped with a built-in mounting point located on the bottom of the unit to mount it to a tripod.

Use the LifThor bag to store your DJI Smart Controller & LifThor Pro
